Professional experience

2011 – present **JOHNSON CONTROLS INTERNATIONAL**, Bratislava, Slovak Republic
full-time job, Senior IT system administrator (until April 2016)
full-time job, SAP Basis Platform Team Leader (since May 2016)
SAP Basis – configuration of transport management system of different SAP landscapes, performing system copies, support packages implementation, implementation of SAP notes, kernel patches, kernel upgrades, system monitoring, investigation of system dumps, analysis of system performance and SAP tuning, parameters and profiles management, content repository maintenance, user maintenance (including CUA), unix scripts creation and maintenance, printer, fax, mail and interfaces (TaxWare, Trex, RightFax, SAPConsole, ADS, Content Servers, IXOS, ...) administration. All of this within 36 complex system landscapes including ECC, BI, SRM, SCM, CRM, EWM, PI, Portal and Solution Manager systems running on Oracle, MSSQL, SAP HANA and SAPDB.
Oracle DB – user administration, DB security and auditing, performing database copies, pre-/post- copy activities, DB refreshes, database upgrades, patchsets installation, patches implementation, installation of new databases, investigation of ORA errors and DB traces, data maintenance, exports and imports, analysis of database performance, parameter maintenance and tuning. All of this within 157 oracle landscapes including 9i, 10g and 11g plus many additional SAP databases administration in similar way.

PROJECT PARTICIPATION AND WORK SUCCESSES

Disaster Recovery	Disaster Recovery simulation – annual project where team received a disaster scenario and had to recover the systems to fully operational state.
JCI Award	Awarded for an exceptional performance during performance tuning of important and problematic SAP system.
SAP Standardization Initiative	I have built a set of procedures, standards, policies and best practices for our whole environment. Purpose of this initiative was to standardize SAP's environment for better stability and supportability. Important part was also the patching policy which enabled regular patching of SAP infrastructure (OS, SAP kernel and DB).

2007 – 2011

ACCENTURE TECHNOLOGY SOLUTIONS, Bratislava, Slovak Republic

full-time job, senior programmer

SAP Basis – basis project support, release and technical coordination of projects, responsibility for alignment of objects between different SAP systems, transport coordination, solution of transport errors, configuration of transport management system of different SAP landscapes, system security and audit, coordination of system copies and refreshes, pre-/post- copy activities, support packages implementation, SPAU and SPDD resolution, implementation of SAP notes, system monitoring, investigation of system dumps, analysis of system performance and SAP tuning, jobs creation and maintenance, archiving, content repository maintenance, administration of source system connections, configuration of interfaces, unix scripts adjustments, user and role administration, printer, fax, mail and business workplace administration, system ownership. All of this within 12 complex system landscapes including R/3, BW, XI and Solution Manager systems.

PROJECT PARTICIPATION AND WORK SUCCESSES

System Consolidation Consolidation of system – merge several systems, landscapes setup, adaptation of processes and SAP objects to new environment.
System Carve Out Carve out of systems as client split into two separate entities – migration of servers, setup of whole system landscapes, system copies, adaptation of processes and SAP objects to new environment.
BDC Oscar Awarded for exhibiting an exceptional technical skills.
